

Right now, Tin & Timber:

1. Create minimal waste and use minimal non-sustainable packaging
2. Have a recycling program that includes:
 - Paper and cardboard
 - Soft plastics
3. Use recyclable aluminium cans or recyclable / reusable glass for their product
4. Aim to be a paperless business

5. Do not use any products sourced from animals

6. Sell a product that is entirely natural, with no artificial flavours, preservatives or sweeteners
7. Use a local, socially responsible roaster
8. Offer a healthier alternative than other caffeinated products on the market

Future goals include:

1. Diverting organic waste (coffee grinds) from landfill
2. Assessing current energy usage and making improvements where possible
3. Continue working with suppliers to ultimately end up with all sustainable packaging
